

## List of Figures

- Figure 1: The Industry's Declining R&D Productivity
- Figure 2: Overview of Employment of Systems Biology in Pharma
- Figure 3: Systems Biology Paradigm #1
- Figure 4: Chemical Tools Typical For Drug Discovery
- Figure 5: Number of Drug Targets Depicted in Venn Diagram
- Figure 6: Biochemical Tools Typical For Drug Discovery
- Figure 7: Molecular Biology Tools Typical For Drug Discovery
- Figure 8: Mapping of Gene to Function and Emergence
- Figure 9: Computational Systems Biology in Drug Discovery
- Figure 10: Network Topology
- Figure 11: *In silico* Pharmacology Tools in Drug Development
- Figure 12: *In silico* Pharmacokinetics Tools in Drug Development
- Figure 13: Flow Chart of Developing ADME/Tox & PBPK
- Figure 14: Multiscale CSB Tools in Drug Discovery & Development
- Figure 15: Systems Biology Paradigm 2
- Figure 16: Systems Biology Paradigm 3
- Figure 17: Modular Systems Biology at Correlation Network™ Inference (CNI)
- Figure 18: Systems Biology Paradigm 4
- Figure 19: Systems Biology Paradigm 5
- Figure 20: Systems Biology Tools in Drug Development
- Figure 21: Mind Map of Microbial/Mammalian Cell Bioreactor Scale-Up
- Figure 22: R&D in Perspective
- Figure 23: Systems Biology Paradigm 6
- Figure 24: Different Soft R&D Strategies
- Figure 25: Overview of Systems Biology Paradigms
